Office Action Summary	Application No. 10/675,670	Applicant(s) DANKOVICH ET AL.	
	Examiner PRAMILA PARTHASARATHY	Art Unit 2136	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. This action is in response to the communication 05/22/2008. Claims 1-5, 9-16, 20-22 have been cancelled. Claims 6 – 8 and 17-19 are currently pending.

Terminal Disclaimer

2. The terminal disclaimer filed on 5/22/2008 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of US Patent 6,360,262 has been reviewed.

Response to Arguments

3. Applicant's arguments with respect to double patenting rejection, in view of filed Terminal Disclaimer, have been fully considered and are persuasive. The double patenting rejection of Claims 6-8 and 17-19 has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of amended claims 6-8 and 17-19 with respect to US Patents 7,039,804 (please see item #5).
4. Applicant's arguments with respect to 35 USC 102, prior art rejection, in view of filed amended claims, have been fully considered and are persuasive. The prior art rejection of Claims 6-8 and 17-19 has been withdrawn.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

Art Unit: 2136

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

5. Amended Claims 6 – 8 and 17 – 19 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1 – 26 of U.S. Patent No. 7,039,804. Although the conflicting claims are not identical, they are not patentably distinct from each other because the instant case, all elements of claims 6 – 8 and 17 – 19 correspond to the claims of 1 – 26 of the Patented claims, in the instant claims element “the single user registry adapter framework interface router maintains a one-to-one mapping between each supported domain and associated registry for the supported domain”, is referred in the copending application claims as “plurality of heterogeneous servers and registry information that is specific to ones of said plurality of applications”.

A partial correspondence between the instant claims and the copending claims are as follows:

10/675,670	7,039,804
receiving, from a user, an authentication request comprising a user name associated with said user, a password associated with said user, and a domain name associated with said user;	responsive to receiving a request to authenticate user ... constructing a credential of the user; wherein the said credential of the user is constructed using a user identifier and password;
using said domain name to select, by a single user registry adapter framework interface router that is operatively coupled to a plurality of heterogeneous servers, an access protocol adapter, an access registry that is associated with the domain name,	plurality of heterogeneous servers and registry information that is specific to ones of plurality of applications; and selectively allowing access to resource based on the credential of the user ... go through a user registry adapter;
routing access queries from said user to said access registry using said selected access protocol adapter	an adapter integrating the plurality of servers;
authenticating said user using said selected access registry	selectively allowing access to a resource
